Art Unit: 2175

. .

<u>Preliminary Note</u>: The present application includes claims 46-59 and 63-64 that were previously examined and newly added claims 65-137. In this action, only newly added claims 65-137 are subject to restriction.

This application contains claims (newly added claims 65-137) directed to the following patentably distinct species of the claimed invention:

Group I: Systems and methods for providing substitute continuing payment to a 401(a) retirement plan.

Group II: Systems and methods for providing substitute continuing payments to a 457 plan.

Group III: Systems and methods for providing substitute continuing payments to a 403(b) plan.

Group IV: Systems and methods for providing substitute continuing payments to a 457 plan.

Applicant may suggest claims belonging to single the elected group, which will be considered by Examiner. However, examination will be limited to claims 46-59, 63-64 and the claims belonging to the elected group.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, independent claims 65, 80, 84, 88, 96, 104 and 114 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

Application/Control Number: 09/328,856

Art Unit: 2175

thereon, including any claims subsequently added. An argument that a claim is allowable or that

all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of

claims to additional species which are written in dependent form or otherwise include all the

limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

the election, applicant must indicate which are readable upon the elected species. MPEP §

809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct,

applicant should submit evidence or identify such evidence now of record showing the species to

be obvious variants or clearly admit on the record that this is the case. In either instance, if the

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission

may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication should be directed to Sam Rimell at

telephone number (703) 306-5626.
